

# MAXSCHOLAR

THE LEARNING CENTER

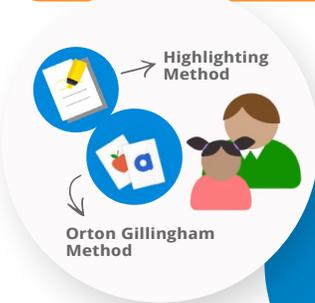

## ABOUT THE PROGRAM

Students receive multi-sensory instruction using a cutting edge blended learning model. Our instructional methodologies are leveraged with the cutting edge technology of MaxScholar software providing a more personalized approach to learning. An initial consultation for admission includes an informal educational evaluation which will indicate current grade levels in reading comprehension, decoding, phonemic awareness, math, and writing skills (ability to write paragraphs, essays and grammar). We also offer consultation services such as a review of previous psycho-educational tests. We then customize your child's learning experience in our research based and highly effective MaxScholar learning hub. The summer intensives provide individualized attention in our small group learning environment. Here students learn to focus and become confident while working alongside our educational specialists as well as other students. Your child will become more skilled and confident as they learn to master essential skills required for school success! Maxscholar will increase your child's mastery, which will transfer to the next school year. Many students improve up to two grade levels during our intensive summer sessions. MaxScholar, our learning solution to your child's ultimate academic potential.

## PARENT AND SCHOOL COMMUNICATION

At the beginning and conclusion of the summer session, each student receives a student learning plan which is their learning road map. At the conclusion of the summer sessions, contacts and recommendations may be made with each student's home school.

  - ◆ Open-ended Responses to Writing Prompts
- ◆ Vocabulary
- ◆ Orton Gillingham
  - ◆ Phonological Awareness
  - ◆ Sound-Symbol Association
  - ◆ Syllable Instruction
  - ◆ Morphology (roots, prefixes, suffixes)
- ◆ Multi-sensory math strategies
  - ◆ Math Fluency and Developing Proficiency in Solving Word Problems

## COURSES:

### READING INSTRUCTION:

Emphasizes the Orton-Gillingham approach to reading through a multisensory, systematic form of instruction that teaches language in its phonological, morphological, syntactic, and semantic aspects to build stronger language skills. Focus will be placed on improving decoding ability and reading fluency.

### WRITTEN LANGUAGE SKILLS:

Focuses on building an understanding of basic sentence structure, paragraph format, punctuation and capitalization, proofreading, and handwriting. Multi-sensory activities will be used to enhance written language skills.

### READING COMPREHENSION DEVELOPMENT:

Understanding what one reads is the most important aspect of reading. Specific multi-sensory reading comprehension strategies will be taught, such as making predictions, visualizing, verbalizing, summarizing and rewriting.

### MULTI-SENSORY MATH STRATEGIES:

We use hands-on, multi-sensory approaches to teaching the language of math. We will focus on strategies to build confidence and develop core mathematical processing skills.
